Mr. Mark R. Kretchmer
212 Carnegie Center
Suite 206
Princeton, NJ 08540

Dear Mark:

As 2007 comes to an end and I leave Middlesex Borough I wanted to express my deep appreciation for all the work Metropolitan Technologies, LLC completed and are completing on our new police building.

I would be remiss if I didn't recognize your and Mr. Vincent Castellano's involvement in providing critical services and reviews on our Phones/Data switches/servers, security system, 911 System PSAP, Radio Systems, and Telecom Cabling just to name some of your activities. It didn't take long for me to realize your and Vincent's depth of knowledge in these areas, your dedication to develop outstanding systems, and your awareness to time lines. I would also like to recognize your coordination and communication skills as the police department computer rep, the Borough's computer rep (Rutgers), and all the other contractors (EPIC, Monmouth, Cornerstone, and me as the owner rep) were involved in moving the work forward. Since I worked primarily with Vincent I can only address his professionalism, his expertise, his innate ability as a team player, and work in reviewing and recommending contractor's quotes for the planned work. He has made himself available at all times and readily answers questions with explanations to a novice like me.

I am looking forward to the completion of our police building in February 2008 and want to thank Metropolitan Technologies, LLC for their involvement, their efforts and help this year.

Sincerely,

Ronald S. Dobies
