"Ten Towns, One Community"

October 30, 2007

Dear Mr. Kretchmer,

Now that our Data Center expansion is complete, we wanted to share with you how pleased we were with the experience.

Metropolitan Technologies was a great asset in being able to not only take care of any IT Design issues, but also in aiding the township in assembling & recommending an architect and MEP firm. MT provided the kind of professionalism and engineering expertise we needed to get through this very delicate expansion, as our live 24/7 operations are mission critical and could not be interrupted. The Township, the Police Department and the school district all run on this data center.

Working on expanding a live data center with all the various trades and replacing a UPS, was not easy. However, with the help MT provided, the Township is grateful to have you as our IT consultant. We look forward to a continued business partnership with MT.

Thanks again,

Michael D. Esolda
Chief Information Officer
Woodbridge Township/School District
